

PRODUCT PRESENTATION

EADP

Dense Alcoholic Extract of Propolis **42% of active ingredients**

This liquid **Propolis** extract contains **420** gr. /kg of **Soft Propolis Extract** (active ingredients) and 46% of alcohol content.

As the EADP is highly concentrated in active ingredients, a small percentage is enough to make the final product very effective: 2 to 5% is ideal for foodstuff or food supplements (sweets, syrups etc...) and 0.1 to 0.5% for cosmetics. When used in “pharmaceutical products”, 5 to 10% of EADP can be used to achieved a specific result (for a healing balm for instance).

Physical Characteristics:

- * EADP can only be dissolved in alcohol (90°).
- * In water, it precipitates rapidly.
- * L'EADP is indissoluble in oil.

Origin: France
